

# PROJECT 10073 RECORD

1. DATE - TIME GROUP 27 Jan 68 28/0100Z	2. LOCATION 100 miles west of Milwaukee, Wisconsin
3. SOURCE Civilian	10. CONCLUSION Probable: Astro(bolide)
4. NUMBER OF OBJECTS 1	
5. LENGTH OF OBSERVATION 3-4 seconds	11. BRIEF SUMMARY AND ANALYSIS Observer sighted an object that a baseball bat, round on the nose and tapering at tail end. The object was glowing white on the nose and blue white on the tail. The object seemed to descend at about a 30 degree angle in a NW direction. Two glowing blue white balls were ejected on each side of the object shortly after which the object disappeared. The observer turned on the airplanes radar but no echo was observed from the object.
6. TYPE OF OBSERVATION Air Visual	
7. COURSE NW	
8. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Comments: The description of the object is consistent with that of a bolide. The fact that the planes radar did not paint the object further suggests this fact.
9. PHYSICAL EVIDENCE <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	ZELSDORF
